

Security Management Policy

(OAR 580-055-0050-1)

The purpose of this Security Management document is to clearly outline the roles of the President, CIO, and CISO in fulfilling Eastern Oregon University's responsibilities with respect to information security as directed in the OUS Information Security Policy of Oregon Administrative Rules 580-055-0000.

President: As directed in the OUS Information Security Policy, the President has overall responsibility for institutional provisions set forth in that policy. The President will hold the CIO and CISO accountable for instituting appropriate policies, standards and guidelines to ensure the security, integrity and availability of EOU's information assets.

Chief Information Officer (CIO): As directed in the OUS Information Security Policy, the CIO is responsible for ensuring that the institutional policies governing Information Systems Security, User and Personal Information Security, Security Operations, Network and Telecommunications Security, Physical and Environmental Security, Disaster Recovery and Awareness, Education and Training are developed and adhered to in accordance with the OUS policy.

Chief Information Security Officer (CISO): The CISO is responsible for EOU's security program and for ensuring that institutional policies, standards and guidelines are developed, implemented, maintained and adhered to.
