

WHAT DO YOU KNOW ABOUT YOUR BRAIN?

Did you know that . . .

Your brain is faster and more powerful than any computer you've ever used.

It looks like a soft, wrinkly, gray sponge and it's almost as heavy as a carton of orange juice.

Your brain could weigh up to 3 pounds by the time you are full grown.

The left side of the brain allows you to be analytical, helping you with math, speech and logic.

The right

side of the brain allows you to think about abstract things like music, colors, and shapes.

The Cerebrum

The Cerebrum is the largest part of your brain and it makes up about 85% of your brain.

The cerebrum allows humans to be more intelligent than animals.
