

Emergency Medical Services Administration

The Emergency Medical Services Administration Program is based upon the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) Model Curriculum for an Emergency Medical Services bachelor's degree. The EMSA program may be completed entirely online and is primarily designed for EMT's and paramedics who desire advanced knowledge related to the management and administration of EMS systems. Students that enter the program with an associate's degree will complete their bachelor's degree as a BA, BS, or Bachelor of Applied Science (BAS) depending on how they enter the program.

Transfer students: Completion of an associate's degree that meets the equivalent of the Oregon ASOT or AAOT and EMT-basic (or higher) certification/licensure should allow the transfer student to graduate within 2 years.

REQUIREMENTS TO ENTER EMSA PROGRAM

AS, AA or AAS degree and current EMT certification. Students may enter the program with current EMT certification and no associate's degree but are restricted to the BS or BA degree. Students may

provisionally enter the program without EMT certification but may not enroll in upper division EMSA courses until the student has become certified as an EMT-basic (or equivalent).

REQUIRED SKILL COURSES

WR 121 Expos Prose Writing
MATH 105 or higher
BA 225 Business Communications

EMERGENCY MEDICAL SERVICES ADMIN COURSE DESCRIPTIONS

EMSA 307 - EMS Risk Management & Safety (Credits: 3)

This course introduces the student to the risk management principles of an Emergency Medical Services (EMS) agency. Emphasis is on safety from the perspective of the field provider. Student must have at least junior standing to register for this course.

EMSA 309 - EMS Communications Management (Credits: 3)

This is an upper-level baccalaureate course for students interested in the management of an Emergency Medical Services (EMS) communications system. This course introduces the EMS professional to the communications systems and methodologies available to governmental and private EMS providers. Students explore issues in EMS communications technology, software, data management, and physical plant considerations. Student must have at least junior standing to register for this course.

EMSA 311 - Management of Emergency Medical Services (Credits: 3)

This is an upper-level baccalaureate course for students interested in the practice and principles of Emergency Medical Services (EMS) systems management and the processes that contribute to the effectiveness of day-to-day operations within an EMS organization. This course introduces the EMS professional to topics that include government structure, strategic planning, injury prevention, risk management and safety, customer service, human resources management, financial management, fleet management, career development, quality management, data collection and research, labor relations, and special operations. Student must have at least junior standing to register for this course.

EMSA 313 - Legal, Political & Regulatory Environment of EMS (Credits: 3)

This is an upper-level baccalaureate course for students interested in the field of legal, political and regulatory environment of Emergency Medical Services (EMS). This course introduces the EMS professional to the legal aspects of EMS. Students explore issues in malpractice, consent and refusal of treatment, Occupational Safety and Health Administration (OSHA), employment issues, and risk management. EMS students gain insights into the legal liabilities in EMS. Student must have at least junior standing to register for this course.

EMSA 315 - EMS Education (Credits: 3)

This is an upper-level baccalaureate course for students interested in Emergency Medical Services (EMS) education. This course introduces the EMS professional to the education system as it relates to EMS education. Students explore issues in curriculum development, teaching, program direction, and

development. Student must have at least junior standing to register for this course.

EMSA 405 - Finance of EMS Systems (Credits: 3)

This is an upper-level baccalaureate course for students interested in the practice and principles of Emergency Medical Services (EMS) systems finance and budget and the processes that contribute to assets and liabilities of an EMS system. This course introduces the EMS professional to topics that include but are not limited to budgeting, auditing, billing, risk-financing and internal auditing. Prerequisites: EMSA 311 Management of Emergency Medical Services. Student must have at least junior standing to register for this course.

EMSA 407 - EMS Public Information & Community Relations (Credits: 3)

This is an upper-level baccalaureate course for students interested in public information and community relations in Emergency Medical Services (EMS). This course introduces the EMS professional to benefits of community information and community relations. Students explore issues in marketing, crafting the message, identifying the audience, developing programs, and creating press releases. Student must have at least junior standing to register for this course.

EMSA 411 - Analytical Approaches to EMS (Credits: 3)

This is an upper-level baccalaureate course for students interested in the practice and principles of Emergency Medical Services (EMS) systems management and the processes that contribute to the effectiveness of day-to-day operations within an EMS organization. This course introduces the EMS professional to topics that include introduction and purpose of analysis; analysis in parallel professions; problem identification; foundational analysis; data collection; financial analysis; cost-benefit analysis; policy and impact analysis; and project development. Student must have at least junior standing to register for this course.

EMSA 415 - Community Risk Reduction in EMS (Credits: 3)

Institutional Graduation Requirement – UWR

This is an upper-level baccalaureate course for students interested in public health and community relations in Emergency Medical Services (EMS). This course introduces the EMS professional to benefits of community risk analysis, program development, and ongoing program analysis. Students explore issues in identifying and communicating risk, crafting appropriate risk-reduction programs, building appropriate response guides, developing recovery procedures, and creating press releases. Student must have at least junior standing to register for this course.
