

# Eastern Oregon University- Eyewash and Safety Shower

---

## Eyewash and Shower Testing

Throughout Eastern Oregon University's campus, there are eyewash and safety showers. These are present in locations where chemical or debris hazards are present.

Eastern Oregon University regularly tests the eyewash and safety showers throughout the year to ensure that each station has, clean water, water of an adequate temperature, and a reasonable rate of flow. After each inspection, the shower tag is updated. If you notice a station hasn't been documented in a while please notify the EH&S team.

## Eyewash and Shower Procedures

Eyewash and showers should only be activated in an emergency. If activated the individual should continue to wash the exposed location for 15 minutes to ensure a thorough cleansing. When a shower or eyewash requires activation notify safety and security at 541-963-3911 to get additional assistance for the individual. The area will need to be mopped and absorbed using the absorbent in the shower kit to prevent water damage to the room.
