Institutional Mission Intensities and Defining Metrics

Each matrix lists mission aspects in the row categories and the institutions across the columns. The numerical entries in the cells represent the intensity of the commitment each institution has to the mission aspect in that row.

- A **value of 1** implies primary mission intensity for that institution – a commitment to a leadership responsibility in providing coverage for that aspect.
- A **value of 2** indicates secondary mission intensity – substantial involvement by the institution but not a commitment to leadership of the area.
- A **value of 3** indicates some involvement by that institution in that mission aspect.
- A **blank cell** indicates that the institution is not materially involved in that mission aspect. It is important to note that these are *institution-declared* mission intensities and the numbers should not be misinterpreted to stand for a ranking of programs or a measure of program quality but, rather, the numbers represent a commitment on the part of the university to offer this set of mission aligned programs, but with varying intensity.

Each component of the institution’s mission is multi-faceted and is presented here in terse form. It is also the case that quantitative metrics alone do not capture all the essential relationships among various dimensions of an institution and should be factored in when assessing an institution’s mission.

Each matrix is followed by lists of institution-specific metrics from which each institution has selected the most valid indicators for fulfilling the mission aspects for which the institution declares primary mission intensity. *Note: OHSU is listed in the matrices to demonstrate their contributions to the network of public higher education in the state.*

- Alignment Dimension #1 – Student Access Mission Intensity
- Alignment Dimension #2 – Academic Program Mission Intensity
- Alignment Dimension #3 – Innovation/Research Intensity
