*Indicates courses that are not required by all Chiropractic programs, but highly recommended.

The curriculum in pre-chiropractic is designed to prepare students for admission to a professional program in chiropractic medicine. A bachelor's degree (B.A./B.S.) is not required prior to application to some chiropractic programs, however, it is strongly recommended and a minimum of 135 quarter credit hours is required for matriculation to all chiropractic programs with at least 36 of these credit hours coming from physical life sciences with labs. No particular major is preferred; however a pre-medical foundation is widely viewed as the best preparation for the doctor of chiropractic curriculum.
