

Colleagues:

EPCC has been asked to transform the ideas for University Learning Outcomes (ULO) generated during our opening sessions into appropriate language for Eastern. We have come up with the statement below as one that attempts to encapsulate the broad ideals that were discussed. We also attempted to align the statement with GE principles and outcomes, which are skills expected of all students that graduate from Eastern.

Our goal was to provide ULOs that can be evaluated by current assessments that are occurring across the university (Program and GE assessments for example). It was also our intention to be inclusive of all programs across campus. Finally, we wanted to keep our ULOs short and allow for a broad variety of application and interpretation.

Please send any constructive feedback and/or suggestions to me.

Proposed ULO:

Students who graduate from Eastern Oregon University can demonstrate:

- **effective application of knowledge that is broad and varied**
- **competence in inquiry-based and integrated learning**
- **effective use of communication skills**
- **aptitude in critical and creative thinking**
- **dedication to civic engagement and service to society**

Thank you for your time.
