Our bachelor's degree gets you there!

How would you like a job with great working conditions, flexible hours, high pay, and opportunities anywhere in the world? Do you enjoy the challenge of solving all kinds of problems? If so, computer science is the career for you! Our computer science program is the perfect starting point for great opportunities in software development. Our small class sizes, individual attention, excellent facilities and experienced faculty prepare professionals to work for employers large and small.

Flexible for your schedule!
This major can be completed: On campus — La Grande

”Within six months of getting my degree, I got a job as a web developer. Most of my portfolio consisted of work that I did through EOU’s CS program. Now, four years since I graduated, I am a support services analyst for one of the largest employers in the region with plenty of room for advancement.”

Amy Hillecke, ’10
Computer Science & Multimedia Studies
La Grande, Ore.
Study – Learn – Excel

> Our students love the small class sizes and individual attention from their professors.

> Student clubs like PiBots give students a chance to design and build their own computer-controlled projects.

> Internship opportunities provide a chance to get real-world experience applying what students learn at school.

> You’ll earn a degree that’s in high demand all over the country and around the world.

> Enter a field with high-paying jobs, great benefits and working conditions, and expanding opportunities.

Prepare for a career:
